Transmission
Industries

www.couplingsindia.com

Incepted in the year 1963, B.V Transmission Industries is situated in Mumbai (India) and is occupied with assembling, providing and sending out of a broad scope of Industrial components. We are leading manufacturer and supplier of different types of products like Couplings, Chain, Sprocket, Pulley and Gear in India. We supply the best quality materials with the use of highest quality materials and also use of the latest technologies. For acknowledged their component like erosion obstruction, simple establishment, light weight, high rigidity and exact measurement.

GEAR COUPLING

➤ Coupling

First of all what is coupling? Coupling is a device used to interface two shafts together at their finishes to transmit control. We manufacture different types of Couplings. These whole offered items are produced utilizing trend setting innovation and great crude materials in complete adherence to the worldwide quality standards.

➤ Features of Coupling

- To give connection of shafts of units made independently.
- To permit misalignment of the shafts or to present mechanical adaptability.
- To decrease the transmission of shock loads
- To present protection against overloads.
- To adjust the vibration attributes
- To connect driving and the driven part

ENCODER COUPLING

UNIVERSAL JOINT COUPLING

TYPES OF COUPLING

- HRC COUPLING
- SLEEVE COUPLING
- JAW COUPLING
- GEAR COUPLING
- FLUID COUPLING
- DISCOFLEX COUPLING
- UNIVERSAL JOINT COUPLING

BELT PULLEY

www.couplingsindia.com

POLY PULLEY

➤ Pulley

A pulley is a wheel on an axle or shaft that is intended to help develop and alter of course of a taut cable or belt, or transfer of intensity between the shaft and cable or belt. We are the leading manufacturer, supplier and exporter of the wide range of the pulleys like Belt pulley, Timing pulley, Taper Lock Pulleys, Flat belt Pulley, Variable speed pulley, step pulley, Poly V pulley.

HELICAL GEAR

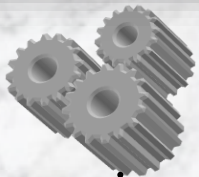

WORM GEAR

BEVEL GEAR

SPUR GEAR

➤ Gear

A gear is a turning machine part having cut teeth or, on account of a gear, embedded teeth, which work with another toothed part to transmit torque. Geared gadgets can change the speed, torque, and course of a power source. We are the leading manufacturer, supplier and of the wide range of the gears like Helical Gear, Worm Gear, Bevel Gear, Spur Gear.
